We're not asking you for money.

Just a few words. To people who need us
but don't know we exist.

We're Recording for the Blind. We're
already helping more than 13,000 handicapped
students. But there are a lot more out there who
need our help.

You know who they are. In your work you
come across students who are blind, dyslexic
or physically unable to handle books. These are
the students we help. Since they cannot read
their textbooks, we do it for them. On tape. And
we send the tapes to the students free of charge.

All we want you to do is tell eligible students
about us. Have them contact: Student Services,
RFB, Inc., 215 East 58th Street, N.Y., N.Y. 10022,
(212) 751-0860. We'll take it from there.

It's such a little thing to ask.
